“*Beyond Physicalism* heralds an impending shift of epic proportion in humankind's efforts to understand the nature of reality, and potentially the most significant advance in the recent history of the mind-body debate. This landmark book provides an unprecedented synthesis of science, psychology, philosophy and theology, approaching the deeper truth of all existence.”

— **Eben Alexander III, MD, Neurosurgeon and
author of *Proof of Heaven* and *The Map of Heaven***

The Book

Beyond Physicalism is the product of an unusual fellowship of scientists and humanities scholars who dispute the view that reality is at bottom purely physical, and that human beings are nothing more than extremely complicated biological machines. In their previous publication, *Irreducible Mind*, they argued that physicalism cannot accommodate various well-evidenced empirical phenomena including paranormal or psi phenomena, postmortem survival, and mystical experiences. In this new theory-oriented companion volume they go further by attempting to understand how the world must be constituted in order that these “rogue” phenomena can occur. Drawing upon empirical science, metaphysical philosophy, and the mystical traditions, the authors work toward an improved “big picture” of the general character of reality, one which strongly overlaps territory traditionally occupied by the world’s institutional religions, and which attempts to reconcile science and spirituality by finding a middle path between the polarized fundamentalisms, religious *and* scientific, that have dominated recent public discourse.
